

Aryan Johari

Graduate Software Engineer

Auckland, New Zealand | +64 20 435 5340 | johari.aryan16@gmail.com | LinkedIn | GitHub | Portfolio

Summary

Master's computing graduate (Unitec) who builds useful software end to end in Python and TypeScript — APIs, agent workflows, and web UIs. Post Study Work Visa (no sponsorship required; valid to 29 Aug 2029). Seeking a graduate or junior software engineering role in Auckland; available September 2026. Open to relocate within New Zealand for the right role.

Skills

Languages: Python, TypeScript/JavaScript, SQL

Backend: FastAPI, asyncio, REST APIs

Web: React, WebGL, Three.js, Vite

Tools: Git, Docker, pytest, Vitest

Cloud / Data: AWS S3, PostgreSQL, Gemini API

ML: PyTorch, Presidio

Education

Master of Applied Technology – Computing

Unitec Institute of Technology

Feb 2025 – July 2026

Auckland, New Zealand

- **Completed.** Cumulative GPA 7.667 / 9.0 (Unitec postgraduate scale)
- *Generator-Specific Temporal Forensics* - under review at Machine Vision and Applications (Springer)

Bachelor of Science in Computer Science

Thakur College of Science and Commerce

Sep 2021 – Apr 2024

Mumbai, India

- CGPA: 8.49 / 10

Certifications

AWS Certified Developer – Associate, Amazon Web Services

Projects

ADA

Python, asyncio, SQLite, Gemini API, AWS S3, pytest

Apr 2026 – May 2026

github.com/aryanjohari/ADA

- Built a local AI agent for constrained edge hardware: chat, goals, and background work with SQLite persistence
- Automated ingest-to-publish workflows that push content to AWS S3 after quality checks; 531 pytest tests with GitHub Actions CI

Background Studio / Stage

React, TypeScript, Three.js, WebGL, Vite

Apr 2026 – Aug 2026

image.arkhives.nz

- Built a browser WebGL studio for designing animated hero backgrounds in real time; live at image.arkhives.nz with preset / StageRecipe JSON export
- Wrote a single-pass GLSL compositor for layered effects; 82 Vitest tests covering preset validation

PII Gateway

Python, FastAPI, Presidio, PostgreSQL, Docker, pytest

Mar 2026 – May 2026

github.com/aryanjohari/pii-gateway

- Built an API that redacts personal data from free text and structured JSON before it leaves a system (Presidio + policy rules)
- Added scheduled batch ingest from PostgreSQL, CSV/JSON files, and S3-compatible storage; 33 pytest tests with CI

Experience

SEO Specialist

Specialist Support Services

Jul 2025 – Jul 2026

Auckland, New Zealand

- Grew organic search across three NZ sites: monthly impressions up 414% (1,080 to 5,555); 2,595 clicks, 6.81% CTR, and 8.31 average position over an 11-month GSC window
- Worked with stakeholders on content and technical SEO — GSC setup, indexing, mobile-first pages, and pSEO templates

Junior Website Developer
KRIL Digital

May 2024 – Oct 2024
Mumbai, India

- Built and maintained about 20 client websites (WordPress, React, Shopify); worked with clients on requirements and day-to-day updates; average load 70% faster, 45% visibility uplift, and 30% higher CTR

Website Developer
Koverify

Aug 2023 – Dec 2023
Mumbai, India

- Owned three in-house brand sites (WordPress/WooCommerce): catalog, SEO, Paytm payments, and performance; ~50% visibility and ~90% load improvements (self-reported)
